1. Developmental and Stem Cell Biology is an admitting program. As an admitting program, students may apply and be admitted directly to this program, but the Ph.D. degree is offered only through one of the following departments: Biochemistry, Biology, Cell Biology, Immunology, Molecular Genetics and Microbiology, Neurobiology, Pathology, Pharmacology and Cancer Biology. After the second year of study at Duke, students in an admitting program must select and identify a participating department in which they plan to earn the Ph.D. degree.
